

SHUBHAM THORAT

CodeForces Expert | LeetCode Knight | 10+ NBA/WNBA Apps | 3 YOY | Android • ReactNative • Flutter • Swift

8779616962 | shubham230520011@gmail.com | Thane, MH | [LinkedIn](#) | [Visit My Portfolio](#)

BE in Computer Engineering | Mumbai University (Aug 2019 – May 2023) | CGPA: 8.9

TECHNICAL STACK

- **Languages:** Kotlin, Java, Swift, Python, JS/TS, SQL.
- **Mobile Core:** Android SDK/Internals, Jetpack Compose, XML, iOS.
- **Cross-Platform & Web:** CMP, KMP, Flutter, React Native.
- **Mobile AI & SDKs:** Gemini Nano, ML Kit GenAI, LiteRT (TFLite), Vertex AI for Firebase, AppFunctions
- **AI Productivity:** Gemini in Android Studio, Claude Code, Cursor, GitHub Copilot, Antigravity, AI Automation, MCP, Agentic AI.

ACHIEVEMENTS

- **CodeForces: Expert** (Peak Rating: 1669), 450+ Problems Solved.
- **LeetCode: Knight** (1950+ Problems Solved)

PROJECTS(80+)

- **Kindle:** Kindle is an **AI-powered** application builder that transforms an idea into a complete software project.
- **Echo:** Echo transforms documents such as PDFs into immersive, chapterized audiobooks using AI.
- **ApplyAI:** ApplyAI is a modern, **cross-platform** application designed to transform the job search experience from a tedious manual process into a seamless AI-driven conversation.
- **Loom:** Loom is an **AI platform** that helps developers discover open-source projects and automates the entire GitHub contribution workflow.
- **CineNexusAndroidTV:** High-performance **Android TV media center** with VOD streaming, IPTV support, and cloud-synced watchlists.
- **PhonePilotAI:** **On-device AI assistant** that controls your Android phone using natural language commands.
- **TestPilotAI:** **AI-powered CLI** for automated mobile app testing using natural language and UI interaction.

CERTIFICATIONS

Mobile & Cross Platform (Udemy): (1) Multi-Modular Ecommerce App for Android & iOS (KMP), (2) Ultimate Compose Multiplatform: Android/iOS + Testing

AI Engineering (Udemy): (1) AI Coder: Vibe Coder to Agentic Engineer

WORK EXPERIENCE

Raw Engineering | Associate Application Engineer

Aug 2024-May 2026

- **Multi-Platform Delivery:** Executed full-lifecycle development for **10+ official NBA/WNBA/EuroLeague apps** (Spurs, Heat, Kings, Sky, Aces, etc) across **Android**, **iOS**, and **React Native**, ensuring **99.9% stability for millions of global users**.
- **Modular Architecture:** Engineered **core foundational modules** and **SDKs** using **Android (Kotlin)**, **iOS (Swift)**, and **React Native** to drive firm-wide code reusability and cross-platform consistency.
- **Technical Troubleshooting:** Debugged high-performance communication layers and platform-specific framework internals to maintain **production-grade performance** and **app resiliency**.
- **Agile & DevOps:** Optimized large-scale workflows with cross-functional global teams, leveraging **CI/CD automation** to accelerate delivery across all mobile platforms.

Its Digital Era Marketing Solutions | Android Developer

May 2023 – June 2024

- **Full-Stack Development:** Architected a **Cloud-based Utility Suite** using **Java (Spring Boot + Hibernate)** and **PostgreSQL** on **AWS**, utilizing **Docker** and **Maven** to power the backend for 7+ production apps.
- **Native Android:** Engineered high-performance apps with **Jetpack Compose**, implementing complex **Accessibility Services** and custom **Video/Image processing** engines for specialized media tools.
- **Cross-Platform (Flutter):** Developed a diverse portfolio of Flutter applications, including **VPN**, **Doc Suite**, and **Image Effects**, focusing on memory optimization and low-latency networking.
- **End-to-End Ownership:** Owned the full SDLC for 7+ applications from architecture to deployment ensuring 99% app resiliency.

Fission Youth Marketing Limited | App Development Intern

Mar 2023 – May 2023

- **Modular Engineering:** Engineered the core PlaceBud Android module, a student-centric job ecosystem; implemented a **decoupled architecture** with responsive UI components that improved rendering performance across diverse device configurations.
- **Data Orchestration:** Architected a robust **data synchronization** layer using RESTful APIs and local persistence; managed **complex state-handling** between mobile clients and backend services to ensure 100% data integrity during intermittent network conditions.

AnyWhere Markets | Android Development Intern

Nov 2022 – Jan 2023

- **Engineered core modules for E-Patrakaar (News app)**, optimizing **Room/SQLite databases** and navigation flows for high-performance data handling and stability.
- **Integrated full Firebase suite** (Firestore, Cloud Storage, Auth, FCM) to implement real-time synchronization, secure media hosting, and responsive UI patterns.
